

# ProMIS.Net

## Web based ERP Solution

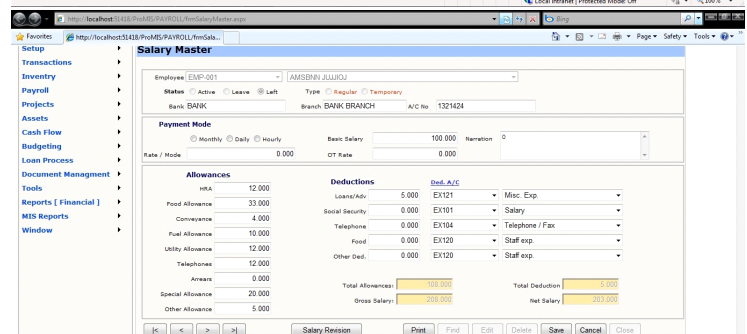

*ProMIS.Net* is our web based solution enabling the organizations to implement efficient and cost-effective ERP solutions. Scheduled to be launched in August 2011, the implementation could be based in Intranet, Web, Cloud models.

- ⇒ ProMIS.Net is a **complete web based ERP** solution with modules including Finance, HR & Payroll, Sales & Purchase processes, Inventory, Asset Management and much more.
- ⇒ It can be implemented as a **customized solution** according to the specific organizational requirements.
- ⇒ The implementation models for ProMIS.Net could be **Intranet, Web or Cloud/hosted** etc.
- ⇒ Intranet model is suitable for organizations **planning to move on to a web based system in future**, but currently need the system within the corporate LAN. It could be hosted to Web in future when required.
- ⇒ In the Web model **dedicated/shared web server** could be setup.
- ⇒ As a Cloud/hosted solution, ProMIS.Net is significantly **cost-effective**.
- ⇒ **No software is required** in client PCs other than a standard **web browser** like Internet Explorer and a fast internet connection.
- ⇒ ProMIS.Net can be implemented as **individual modules**. This will enable the companies to start using a web based system with core functionality initially and **scale up the system** by incorporating other modules in a later date.
- ⇒ A clear advantage of the ProMIS.Net ERP solution is that remote users can access the software from **anywhere with a browser**, which is much more convenient than going through the hassles of installing the system on each Desktop and Laptop and setting up VPN and Terminal Services.
- ⇒ **Employees in remote sites** or traveling overseas can easily access and update the required information in real-time.
- ⇒ **We will manage the hosted solutions** and provide maintenance, support, and upgrading services.

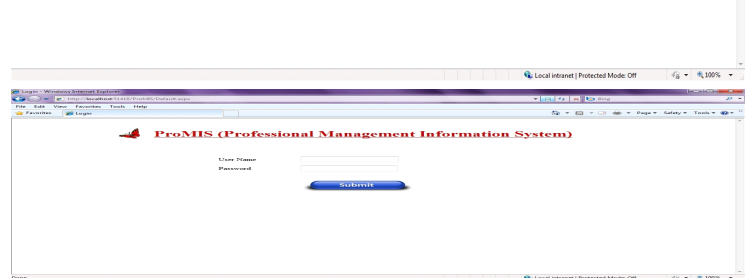

The screenshot shows the 'Receipt Vouchers' form in the ProMIS application. It includes fields for Doc No (1004001), Date (02-Apr-2010), Cash/Bank Code (B101), and Amount (300,000). A table below lists voucher details with columns for Code, Account Name, Narration, Project, Cost Center, Amount, and Cost Code.

| Code   | Account Name        | Narration | Project                    | Cost Center | Amount | Project ID | Cost Code |
|--------|---------------------|-----------|----------------------------|-------------|--------|------------|-----------|
| 100001 | Sundry Debtors Test | WEREWWR   | 001 - Supply of Auto Parts | 100,000     | 001    |            |           |
| 100001 | 001                 | WEREWWR   | 001 - Supply of Auto Parts | 200,000     | 001    |            |           |

The screenshot shows the 'Salary Master' form. It displays 'Payment Mode' (Monthly) and 'Basic Salary' (100,000). It includes sections for 'Allowances' (e.g., HRA, Food Allowance) and 'Deductions' (e.g., Loans Adv, Social Security). Summary fields show Total Allowances (100,000), Gross Salary (300,000), and Net Salary (200,000).

The screenshot shows the ProMIS login screen with the title 'ProMIS (Professional Management Information System)'. It has fields for 'User Name' and 'Password', and a 'SUBMIT' button.
