#### Completely Customised

Each company has its own way of functioning and the information systems should be exactly suitable for their business activities. ProMIS software is always customized to meet the exact requirements of the users.

#### User Friendly

ProMIS is designed for Windows 98 and higher versions. Windows standard menus, appearance and navigation style makes the system simple and easy to operate with. It provides a user friendly graphical interface which makes the learning curve minimum.

#### Integrated System

ProMIS, the completely integrated software offers you the automation of all your business activities. ProMIS responds with prompt information as it is perfectly an online system and all the concerned accounts, stock etc. are updated whenever a transaction is entered.

#### Scalable System

With ProMIS, your information systems grow as the requirements increase. ProMIS has a modular design and additional modules can be added to the system at any point of time. These modules can be integrated to provide a comprehensive solution.

#### Up-to-date Reports

In ProMIS all the transactions are instantly reflected in the related accounts. Books are updated immediately. Hence an up-to-date report could be generated at any time.

#### Complete Accounting

ProMIS Financial Accounting module provides a comprehensive solution to the accounting requirements of the organization. It is the core module of the system. Other modules like Inventory, Payroll etc. can be directly linked with General Ledger and necessary financial accounting statements are generated.

#### Project/Cost Centre Analysis

Project/Cost Centre analysis is performed by specifying the Cost Centres along with each transaction. Relevant Accounts Statements can be generated for each Project/Cost Centre depending on the requirements of the user.

#### Payroll & HRMS

The payroll module functionalities goes beyond the preparation of monthly payroll. The complete employee information can be stored in the system. The expiry status of employee documents can be monitored at any time.

#### Document Management

Ensures current information on various documents across the organization including incoming and outgoing documents. This keeps track of the document flow within the organization.

#### Flexible Reporting

All reports can be viewed on screen, printed or exported to a variety of windows file formats including MS-Excel and MS-Word formats.
