

ProMIS

Professional
Management
Information
System

ProMIS is completely designed and developed in Oman to address the local requirements.

Student Information

Manages the basic data regarding students. This includes admission details, postal address, residential address, contact details of parents/guardian, telephone, fax, mobile, email, nationality, language, gender, religion, details of previous institutions etc.

Fee Schedules

The fee schedules for different classes and courses can be entered. The schedule can include various types of fees with different payment frequency, sponsorship and amount. These fee items can be linked with appropriate general ledger account for transferring the data to accounts.

Student Ledger

An individual sub ledger will be automatically created for all students by the system. This will include all transactions related with fees.

Health Card

Medical details of students can be stored. This includes the physical appearance, presence of any diseases, immunization status etc.

Library Management

Comprehensive library module to manage books and other resources like Audio/Video tapes, CDs, Maps, Drawings, Catalogs etc.

Educational Information System for Colleges, Schools & Training Institutes

The **ProMIS Educational Information System** is a comprehensive solution for Colleges & Educational Institutes to effectively manage Academic as well as Financial information. It is a comprehensive solution integrated with Student Registration & Fees, Time Table, Attendance, Assignments, Grading & Transcript Preparation, Financial Accounting, Budgeting, HR & Payroll, Inventory Control (for Stores), Fixed Asset Management etc. Moreover, **ProMIS Software can be customized specifically for each institution according to their policies and procedures.**
